// PROJECTS

>> SOFTWARE ENGINEER

Client Project | Irving, TX | June 2023 to Present

An enterprise application for a multinational telecommunications conglomerate which allows the customer to view their next month's bill.

- Work with members from within my organization located both onshore and offshore as well as members from client company
- Work on three different domains: pricing, enabler, shop cart
- Analyze and document in spreadsheets specific targeted values in Cassandra queries
- Conduct knowledge transfer documentation for team members
- Reverse engineer Java code by analyzing COBOL code and add nonexistent Java code or confirm the existence of corresponding Java code

- Analyze Kibana logs

- Work with technologies such as Java, Spring Boot, Cassandra, COBOL, Kibana, Google Spreadsheets, Slack

- Document flow of Java and typedef code

>> DATABASE ADMINISTRATOR

Client Project | Remote | August 2022 to May 2023

An enterprise application for a multichannel video programming distributor involving numerous technologies including cloud computing.

- Work with members from within my organization as well as members from client company
- Monitor files
- Majority of technologies used are AWS, MySQL, Python, and Linux
- Single handedly wrote several Python scripts to communicate with MySQL database and execute required tasks
- Work with AWS services such as EC2, S3, RDS, Elastic Beanstalk, Secrets Manager, CloudWatch, SNS, and Compute Optimizer
- Assisted in working with AppDynamics team to install database access agents
- Monitor databases and assist with related issues
